Business Line Food & Beverage Industry

Think Asia. Think DKSH.

Market Expansion Services: dedicated to growing business

We help companies to grow their business in new and existing markets. We expand their access to knowledge, their sourcing base, their revenue opportunities and their market shares. Providing business partners with a comprehensive package of services to reach their individual goals is what we call Market Expansion Services.

Your strategic partner

DKSH is a Swiss company and the world leader in Market Expansion Services with focus on Asia. Our four Business Units – Consumer Goods, Healthcare, Performance Materials and Technology – operate worldwide through an extensive network of experts. We offer a comprehensive range of services along the entire value chain: from sourcing, marketing and sales to distribution and after-sales services. Along with this we offer long-standing relationships, local knowledge and on-the-ground logistics. As a strategic partner, we safeguard the business of our clients and customers while always sharing our unique market insights. It is our aim to be a trusted link between suppliers and customers, taking care of the products of our business partners as if they were our own.

Business Line Food & Beverage Industry

The Business Line Food & Beverage Industry is part of DKSH's Business Unit Performance Materials and provides Market Expansion Services for companies that wish to source, supply or develop materials in the beverage and dairy, confectionary and bakery, food supplements and nutrition, food service and processed food industries. The Business Line Food & Beverage Industry relies on expert know-how, long-standing relationships and the global DKSH network to deliver innovative solutions that yield outstanding results for our business partners.

The best of both worlds – yours and ours

Experience and networks

DKSH has done business in and with Asia for more than 140 years. We are truly at home in Asia, where we have become an integral part of many local business environments. And we are no strangers to the rest of the world either: DKSH operates in 35 countries, with 440 business locations in Asia and 20 in Europe and the Americas, and employing 22,000 specialized staff from 50 nations.

Integrating diverse services

We bridge the markets of Europe, Asia and the Americas, and have the ability to adapt to the businesses we serve in any local market. The diversity of industries DKSH

is involved in is only matched by the range of services we perform: from sourcing raw materials to setting up and running flagship stores for luxury consumer brands, and from feasibility studies and product development to the many facets of marketing.

Our more than 100 state-of-the-art distribution centers work with the largest SAP application in Asia to help execute, track and analyze hundreds of thousands of business transactions every day. The detailed information we gain from this process contributes to the expert knowledge that we use to provide strategic advice to our business partners. Offering all these diverse services from a single source is another important aspect of what we at DKSH call Market Expansion Services.

Experts and entrepreneurs

In order to provide deep industry expertise for these many fields of business, we are not only organized into four Business Units, but are further specialized into Business Lines and Industry Clusters, maintaining the hands-on and entrepreneurial style of business our company was founded on. DKSH provides a balance between specialist knowledge of our partners' industries and a practical business approach that efficiently gets things done.

Performance Materials

What we do

DKSH Performance Materials provides Market Expansion Services for specialty chemicals and ingredients used in the food and beverage, personal care and cosmetics, pharmaceutical and specialty chemicals industries. As a Business Unit we have grown by an average of 13.2% over the past three years. We achieved total sales of CHF 721 million in 2008.

Global reach

We are active in 25 countries, with 45 locations worldwide and 15 sourcing offices that draw from over 70 markets – giving us a network of unrivalled scope and depth. We provide reliable sourcing around

the globe and instant access to markets, managing the entire supply chain of our business partners. With our long-standing experience and relationships in the market we support and serve our customers' businesses whether small, medium-sized or on a multinational scale. We speak the local languages and understand the local business environments.

Ideas to market

Innovation cycles are growing ever faster and our business partners are under pressure to deliver new products at shorter intervals and lower overall cost. DKSH Performance Materials operates 16 application and formulation laboratories across Asia and the Americas, where we generate product

ideas, develop and customize them, work on new ingredients and technology applications, provide hands-on training, and run acceptance tests. In short: we cut time-to-market by actively researching and formulating solutions for the evolving needs of our business partners.

As a highly competent development partner we help to cut costs significantly. With the market insight gained from 4,000 suppliers and 20,000 customers worldwide, we have the expertise to know exactly what matters in a specific application or product. We proactively put insights, expert knowledge and our networks to use to obtain tangible business results for our partners.

Business Line Food & Beverage Industry

Who we are

The Business Line Food & Beverage Industry provides concepts, formulations and ingredients to manufacturers in the food and beverage industry, ranging from food raw materials to functional ingredients and institutional products. With our innovative ideas and solutions we help our business partners to develop new products and applications, while providing responsible and traceable sourcing of ingredients through our comprehensive global network. With currently 850 suppliers and 1,600 customers, we deal with all sizes of business partners at all corporate levels, contributing applications know-how that is rec-

ognized throughout the industry. Having built decades' worth of relationships in key innovator markets in Asia, Business Line Food & Beverage Industry helps its business partners to stay a step ahead of the competition. Our dedicated team of 510 experts working from 30 offices in 21 countries offers the full range of Market Expansions Services, covering the entire value chain in combination with vertical industry know-how. Our food technologists, nutritionists, chemists and marketing specialists have the expertise to handle all technological, quality management and regulatory issues, thereby ensuring the high degree of customization in the services and products we offer.

What we do and how we do it

Beyond merely sourcing materials, we provide formulations and food ingredients such as natural colors, flavors and flavoring systems, emulsifiers, thickeners, stabilizers, sweeteners, taste enhancers, preservatives and processed raw materials like frozen seafood, fruit purees and concentrates, dehydrated seasoning blends, spices and plant extracts. Food & Beverage Industry provides ingredients and fresh ideas that have the power to make products stand out in a crowded market place. Using the latest ingredient technology and application know-how, we also command a global sourcing network to reliably identify po-

tential savings for our business partners. And while our strong scientific background enables us to support entrepreneurs in developing their products from concept to commercialization, we also offer excellent-quality custom manufacturing.

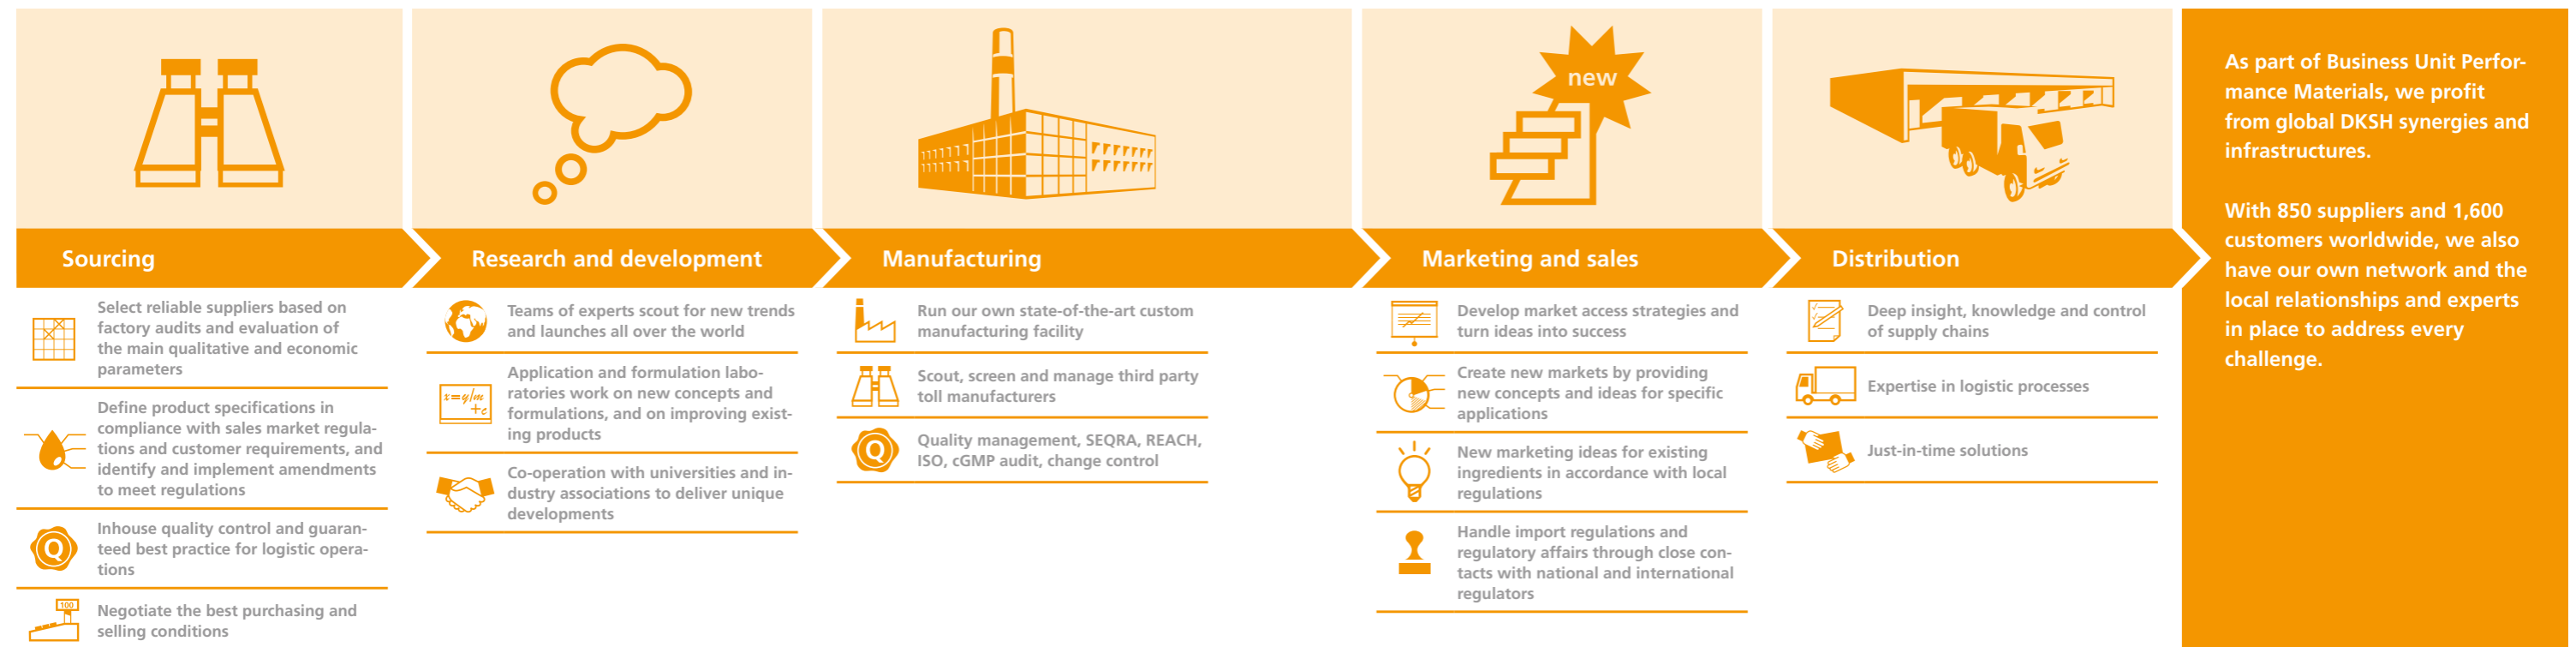

Our profound market insight and overview are the reasons why we can effectively scout for trends with long-term potential in products and technology, creating new markets and business opportunities that outlast short-lived fashions. We offer a unique mix of competencies that go beyond sourcing, distribution and logistics, adding value every step of the way by concerning ourselves with what matters most

to our business partners. We strive for long-term partnerships and regularly organize technical and scientific seminars and training courses, while making a point of open collaboration. Along with this come technical assistance, logistics, warehousing and distribution, quality assurance, finance and insurance, project consulting and our food application and formulation laboratories. Market Expansion Services from DKSH means covering the entire value chain of our industry on a global scale.

The Business Line Food & Beverage Industry is organized into five Industry Clusters in order to focus expert knowledge and cater to specific industry needs:

- Beverage & Dairy
- Confectionary & Bakery
- Food Services
- Food Supplements & Nutrition
- Processed Food

Each Industry Cluster offers the complete array of Market Expansion Services, utilizing the global networks and synergies of DKSH while also understanding local business environments and local regulatory challenges. To better serve the needs of our business partners who require custom manufacturing, we also run our own state-of-the-art production facility located in the Philippines.

Industry Cluster Beverage & Dairy

The Industry Cluster Beverage & Dairy sources and supplies a wide range of high-performance materials and additives for all kinds of beverages and dairy formulations for the beverage and dairy industry. We actively scout for the latest developments around the globe, using our company's strong Asian roots to spot trends and suppliers in the region, focusing on flavors and innovative ingredients with scientifically proven health benefits.

Our dedicated team of global sourcing specialists enables access to excellent ingredients at the best prices, while our application and formulation laboratories contribute customized ideas that help seize trends including heart health and cholesterol reduction, anti-ageing, strengthening of the immune system, weight management, skin health and beauty, as well as natural nutrition. As specialists in flavors and application work, we also offer independent expert counseling for sweetener applications. In short: we combine profound industry expertise and understanding of local market needs to create win-win solutions for suppliers and customers.

Product groups

- Health ingredients
- Fruit and vegetable juice concentrates
- Sweeteners and natural colors
- Flavors
- Milk constituents

We provide the following products:

- For energy drinks:
 - Creatine Monohydrate
 - L-carnitine

- Taurine
- Caffeine
- Amino acids (full range)
- Vitamins
- Coenzyme Q10 (solubilized)
- For natural wellness concepts:
 - Pycnogenol (antioxidant)
 - Acerola (natural vitamin C)
 - Guarana (natural caffeine)
 - Ginseng
 - Superfruit extracts (goji, acai)
 - Omega 3
 - Prebiotic fibers including inuline and FOS
 - Beta glucans from barley and yeast
 - Lutein and zeaxanthin
 - Green and white tea extracts
- Weight management/sweeteners:
 - Acesulfame K
 - Aspartame
 - Neohesperidine DC
 - Saccharine, sodium saccharine
 - Sodium/calcium cyclamat
 - Sucralose
 - Thaumatine
 - Stevia, Lo Han Guo

Industry Cluster Confectionary & Bakery

The Industry Cluster Confectionary & Bakery combines new product concepts and ingredient technology with full technical, quality, regulatory and scientific support. We source, deliver and develop innovative ingredients and solutions for the confectionary and bakery industry.

We have the capability and vertical expertise that covers the entire value chain from formulation, technical application services and manufacturing to warehousing and logistics. We have a strong track record of introducing successful new products while supporting our business partners with technical seminars as well as extensive customer training and education programs. Our technical expertise and global presence assures our business partners' access

to the newest high-technology ingredients. This enables them to move into new premium markets to take advantage of changing customer trends, and gives them an edge over the competition.

Product groups

- Flavors/colors
- Enzymes
- Emulsifiers/stabilizers
- Preservatives/processing aids/sweeteners
- Health ingredients
- Glazors/bakery fillings
- Dietary fibers (inulin, beta glucanes, FOS):
 - Arabinoglactan
- Minerals

- Plant extracts (antioxidants):
 - Soy lecithin
 - Soy derivatives
 - Rice derivatives
 - Flavors
- Cardiovascular:
 - Beta glucans
 - Omega 3
- Weight management:
 - Soluble and insoluble fibers
 - Sweeteners
- Intestinal health/well being:
 - Probiotics
 - Soluble fibers

Industry Cluster Food Services

The Industry Cluster Food Services offers customized products and services to our business partners in the food service industry. Our Market Expansion Services for hotels, restaurants, convenience stores and the airline catering industry include food product applications, customized formulations and recipes, custom manufacturing, consumer market research, sales and marketing, as well as logistics and distribution. For retail chains we source frozen seafood raw materials and value-added products. We also offer training seminars, food styling and product presentations. Our six food application and formulation laboratories have fully equipped and modern laboratories run

by highly qualified R&D professionals who create and develop new products and ideas, continually adding to our broad product portfolio.

We are a leader in seafood sourcing, bringing high-quality frozen seafood from South East Asia to Europe and developing new concepts and customized solutions for frozen seafood. We offer value-added seafood products and new species, as well as new packaging technology, while exercising strict quality control. We stand for responsible seafood sourcing, and our cooperation with reputable producers in Vietnam enables us to supply top-quality freshly caught

and processed seafood at competitive prices. With the help of our highly specialized quality assurance and logistics staff, we are in full control of the supply chain from processor to customer, guaranteeing full cold chain management.

Product groups

- Coating systems
 - Sauces/dips (condiments)
 - Wines
 - Olive oils
 - Chocolate couvertures
 - Toppings/fillings
 - Glazors
 - Marinades
 - Spices
-
- Frozen vegetables:
 - Asparagus
 - Porcini mushrooms
 - Dried morels
 - Frozen fruit:
 - Mango
 - Papaya
 - Dragon fruit
 - Water melon
 - Pineapple
 - Fruit salad
 - Skewers and value-added items (dices, cubes, slices, etc.)
 - Frozen seafood:
 - Crustaceans, wild catch and farmed
 - Fish products, wild catch and farmed
 - Mollusks
 - Cephalopods

Industry Cluster Food Supplements & Nutrition

The Industry Cluster Food Supplements & Nutrition offers sourcing, concepts and applications for the health ingredients, sports nutrition, food supplements and infant formulae industries. Our high-performance ingredients and additives cover the anti-ageing, energy and weight management, immune system and gut health, wellness and cardiovascular health areas.

We specialize in concepts and ideas backed by scientific research and clinical trials, suggesting the right ingredients for the right development. Converting global trends locally, we help develop innovative products and ingredient applications. With our highly specialized and experienced staff we command deep industry vertical expertise that enables us to meet the evolving needs of customers while creating opportunities for our suppliers.

Product groups

- Anti-ageing, antioxidants:
 - Pycnogenol (super antioxidant)
 - CoQ10 (also solubilisates)
 - Alpha lipoic acid (also solubilisates)
 - Green tea extracts
 - Polyphenols from natural extracts
 - Lutein and zeaxanthin
 - Lycopene
 - Acerola extract (natural vitamin C)
 - Vitamins
 - Goji berries and extracts
- Energy and weight management:
 - Creatine Monohydrate
 - Amino acids and taurine
 - Guarana and ginseng extract
 - Catechins (high EGCG), capsaicin

- L-carnitine
- Barley beta glucan and other soluble and insoluble fibers
- Garcinia cambogia (high HCA)
- Alpha lipoic acid (also solubilisates)
- Omega 3 (also from vegetable origin)
- Immune boosters and intestinal health:
 - Probiotic fibers
 - Barley beta glucan, psyllium and other viscous dietary fibers
 - Lactoferrin
 - Yeast-derived glucopolysaccharide
 - Goji berries
 - Vitamin C
- Targeted health and wellness:
 - Creatine Monohydrate
 - Chondroitin, glucosamine and hyaluronic acid
 - Isoflavones, black cohosh, St. John's wort and other botanic extracts
- L-theanine
- DHA
- L-carnitine
- Non-GM lecithin and derivatives
- Cardiovascular health:
 - Barley beta glucan and other dietary fibers
 - Gamma oryzanol
 - Green tea catechins, resveratrol and other natural antioxidants
 - Omega 3
 - Non-GM lecithin
 - L-carnitine
- Other:
 - Amino acids
 - Sweeteners
 - Vitamins

Industry Cluster Processed Food

The Industry Cluster Processed Food caters to the frozen food, seafood, processed meat, prepared meals and snack food industries. We supply specialty and semi-commodity ingredients for food manufacturers. With our strong scientific background and industry expertise we can offer an ingredients toolbox for any kind of processed food formulation. Innovation is one of our main competencies: we constantly develop new ideas and concepts to meet the needs of our customers. Through

our deep network of relationships and connections within the industry we understand local market needs and meet them for our business partners.

Seafood is our specialty, and we supply a wide range of species from Asia. Our cooperation with reputable producers in Vietnam attests to our outstanding performance in terms of project management, quality assurance, logistics solutions and market information. We also offer a

new product range of soups for light and healthy nutrition, consisting of top-quality raw materials with a unique combination of health benefits: less salt, no trans-fat and hard fats, free of gluten, lactose and flavor enhancers. Our products and services offer innovations that produce outstanding results for our business partners. And while always striving to find the most cost-effective solution for our customers, we also practice responsible sourcing and strict quality control.

Product groups

- Toll manufactured spice blends
- Meat substitutes
- TVP
- Soy and rice protein
- Flavors:
 - Savory flavors
 - Flavor enhancers
 - Allergen-free HVPs
 - Ethnic and traditional Japanese flavors
 - Swiss-made savory novelties
 - Chicken flavors
 - Beef and meat flavors
 - Pork and bacon flavors
 - Special flavors
- Soy sauce:
 - Our soy sauces are fully naturally fermented, non-GM, IP-system registered, free of chemical fertilizers and pesticides, free of biological or chemical contaminants, HACCP and ISO 9001 certified
- Seafood:
 - Processed sea and freshwater fish
 - Mollusks
 - Crustaceans
 - Value-added products
 - Sushi toppings
 - Customized frozen seafood novelties
- Seasoning blends
- Other frozen and dried foods

DKSH custom manufacturing facility

To help our business partners focus on their core business activities, maximize productivity and improve cost efficiency, we offer custom food manufacturing services. We are the best option for multinational companies wanting to expand their business in Asia: companies that wish to reach high potential markets such as HALAL and Kosher, as well as start-up companies with limited resources and expertise. Our integrated supply chain service covers everything from sourcing and materials planning to project management and warehousing, and logistics and distribution to enable faster time-

to-market for products. Our 12,000 sqm state-of-the-art production facility has a dry blending and liquid processing capacity of 55,000 metric tons (mt). Our facility, located in the Philippines, is GMP, HACCP and HALAL certified, and complies with Kosher regulations. We provide cost-effective and technically superior products customized to our customers' specifications. Our business partners also benefit from the R&D capabilities of our food application and formulation laboratory, an in-house sensory panel, and a recipe bank that contains more than 6,000 recipes.

Our manufacturing facility offers the following services:

Manufacturing capabilities

- Large dry blending capacity
- Dry, wet and bakery production lines
- Bulk and unitized packaging lines
- Automated and manual filling/packing
- 350 kg to 1.2 mt batch sizes for dry blending
- 300 kg to 2 mt batch sizes for liquid processing
- Silo system for flour
- GMP, HACCP, HALAL certified
- On-going ISO 9001 certification

Custom manufacturing services

- Extensive process and production capabilities for dry and liquid products
- Flexible packaging options

- Silo system for flour
- Professional manufacturing support

Custom manufacturing products

- Drink mixes
- Recipe mixes and seasoning blends
- Marinades and gravies
- Coating systems
- Instant soups
- Catsup, sauces and dressings
- Chocolate syrups
- Fruit syrups, fillings and toppings
- Emulsions
- Emulsified shortenings
- Dough improvers
- Cake emulsifiers
- Bakery blends
- Pan releasing agents
- Muffin and cake mixes

Toll packing services

- Bulk packaging/kraft bags
- Sachets for liquids and powders
- Rigid containers/plastic jars/pails
- Plastic bottles
- Bag in box
- Laminates
- Cans (for powder)

Food application and formulation laboratory

- Ideation
- New product and packaging development
- New ingredients/technology applications
- Recipe duplication
- Product and cost improvement
- Production trials
- Consumer panel testing

Sharing success

Reliability, commitment and flexibility to fulfill the needs of our business partners add up to real solutions for a global economy.

Challenge

Non-GM (genetically modified) soy lecithin is an important emulsifier for the chocolate industry that is increasingly hard to find today. It is particularly challenging to deliver the desired non-GM quality in sufficient quantities and on time to the production plants of customers all over the world.

Approach

Our answer to this shortage and the attached logistical problems was to establish a strong relationship with a specialized

Indian producer and to leverage our advantage as a global provider of Market Expansion Services. Thanks to our global networks, we can offer stable and reliable sourcing for customers' production sites all across the globe. Our ability to guarantee after-sales support and customer service wherever they're needed is a further aspect of our partnership approach.

Result

During the recent negotiation of a new contract with a key customer, one of the world's leading manufacturers of high-quality cocoa and chocolate, we clinched the deal to supply lecithin to production sites in France, Belgium, Poland, Malaysia, Singapore, China, Canada and the USA. This was because we can guarantee supply

and service to all these locations. Two of the largest players in the market now rely on our uninterrupted, worldwide on-time delivery of on-spec non-GM soy lecithin.

Market Expansion Services at work: priceless relationships

Our long-standing relationships and market insight, combined with our global network and innovative approach to sourcing, enable us to turn challenges into opportunities and contribute to the ongoing success of our business partners.
